The Company has been engaged in the business of providing services to the Built Environment since March, 2012.

The Company carries out its activities through its wholly owned subsidiaries and various joint ventures. The Company's principal subsidiaries and joint ventures and their activities are as follows:

BFHJ Project Solutions, LLC ("Project Solutions") engages in real estate management and development. Project Solutions is currently developing a multifamily project in joint venture with a local landowner in New Jersey. In the past, Project Solutions had managed a portfolio of multifamily and retail properties.

Genco International Technologies, LLC ("Genco") made a \$125,000 loan to an LED lighting technology company. The principal of the LED Company defaulted on the Note and several other agreements associated with the transaction. The Company has been successful in obtaining a judgement against LED Company, its subsidiaries and affiliates, as well as the principal of the LED Company. The balance of the Note, along with accrued interest and penalties is \$792,419 and \$765,320 at March 31, 2025 and December 31, 2024, respectively. Genco is vigorously pursuing collection.

BFHJ Energy Solutions, LLC ("BES") is engaged in providing and operating energy conservation measures for commercial properties. BES has interests in solar streetlight technology (developed with a Malaysian technology company) and building sensor technology (developed with a Taiwanese technology company). BES also has developed a sensor-based building monitoring system "the Virtual Property ManagerSM" for application in the United States commercial property market. Working prototypes of the sensors were produced as well as monitoring protocols. BES retains rights to the technology and the service mark.

BFHJ Clean Energy LLC ("Clean Energy") is engaged in the development of solar energy, battery storage and waste to energy projects. Clean Energy has developed several small scale (1MW or less) solar projects in joint venture with local developers and a Taiwanese solar panel manufacturer. Beneficial Power, LLC ("BP") is engaged in larger, utility scale solar power and battery storage projects through joint ventures with institutional investors and global energy companies. Joint ventures include:

- Acquiring and repowering older operating solar projects with a publicly held domestic clean energy investor (“Repowering JV”).
- Developing and operating utility scale solar and battery projects in Virginia and Puerto Rico with a consortium of Korean companies that include a large-scale regional utility, a global EPC and operations contractor and several power engineering companies (“Korean JV”).
- Developing Powered Land projects in Texas with a Texas-based development company.

At March 31, 2025, the Company, through its subsidiaries, was participating in the following renewable energy projects:

UNDER DEVELOPMENT

Projects under development have, or are negotiating local, site approvals, utility approvals and off-take agreements. Such projects will start when financing is committed by institutional lenders and equity partners.

Presently the Company has 5 projects with a total of 376 MW_{dc} of solar (PV) capacity and 4.2GWH_{ac} of battery storage capacity and an initial gas turbine capacity of 900MW_{ac}. All Projects classified as Under Development can commence construction under the rules contained in the legislation passed by the US House of Representatives on May 22, 2025 (the “House Tax Act”). Any projects that do not meet such criteria have been reclassified to Feasibility status. While discussions are underway to secure financing for each project, there can be no assurance that the Company will be successful in its efforts to secure financing.

Project	Type	Size PV _{Wdc} /BATTERY _{MWHac} Gas Turbine _{MWac}	Estimated Start Date	Estimated Completion Date
Texas 1	Powered Land	225MW/1.2GW/300MW	3/1/26	12/31/27*
Texas 2	Powered Land	0MW/1.2GW/300MW	3/1/27	12/31/28*

Virginia 1&2	Utility Scale	26MW0MWH/0MW	9/1/25	12/31/26

*- Project will be a Powered Land solution for power off-takers that cannot readily obtain interconnections with utilities or grid systems. The project will include a gas fired power plant, which will increase as contracted demand increases. Generated power and battery capacity will be sold to off-takers and the local utility (if the project is interconnected).

FEASIBILITY

Projects in the Feasibility Stage are projects where the Company has or is negotiating for site control. The negotiations include long-term land leases for site control and a development joint venture with the landowner.

Presently the Company has 11 projects with a total of 819 MW_{dc} of solar (PV) capacity and 1.76GWH_{ac} of battery storage capacity. There is no assurance that the Company will proceed with these projects at the time the feasibility studies are favorable, all

approvals are obtained, and financing is secured. Furthermore, as discussed above, until the ultimate resolution of the House Tax Act, the Company will continue to classify these projects in the Feasibility status.
